

WHITE SIGNATURE RIBBON

Write on PVC Cards

The White Signature ribbon enables to apply a rectangular area (panel) on the cards where customers can sign for security and legality reasons, or record information such as expiration date or client data. This feature can be required in several applications such as loyalty, leisure, education, healthcare and banking markets.

ADVANTAGES

The White Signature monochrome ribbon is an economical security feature, easy to add to your cards. The printed white panel is very resistant and allows an excellent adhesion and a long lifespan on PVC cards.

Thanks to the ribbon saver feature, available with continuous ribbons, you significantly increase the number of cards to be printed with one single ribbon. Indeed, the surface used on the ribbon corresponds to the real printed surface plus a 7 mm (0.27") jump and not the surface of a whole card.

Tested and validated by Evolis R&D and Quality departments, these consumables bring you printing quality and reliability..

GENERAL SPECIFICATIONS

- Thermal transfer technology
- Ribbon in PET with thin layer of a specially formulated ink designed to accept various dry or wet inks from writing instruments
- Compatible with PVC or composite cards.

STORAGE INFORMATION

These ribbons shall be capable of functioning for up to 1 year after purchase if stored in a cool, dry environment and having remained unopened from the original packaging. Temperature of storage must be between 5-25°C (41 - 77°F) and at RH between 50-70%. Once opened these ribbons shall have a lifetime of 3 months if stored under cool, dry conditions. For all these ribbons, avoid dust, direct sunlight, high humidity and high temperatures. Do not place near solvent or other chemicals.
